

Project: Fitnessdelivery: miscellaneous adjustments  
Website: [www.fitnessdelivery.nl](http://www.fitnessdelivery.nl)

1. Left navigation – remove gap and line

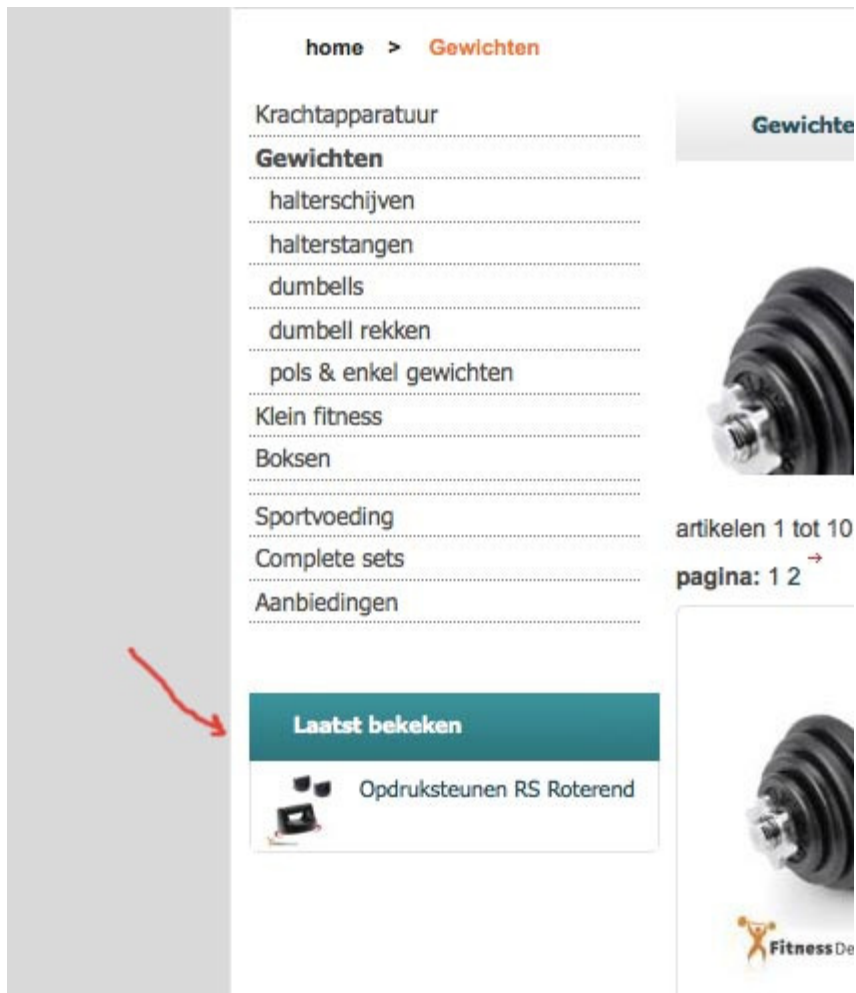

There is a small gap and line in the left navigation, from a previous category.

This category had been deleted but the space/gap and line are still there; they need to be removed.

>next

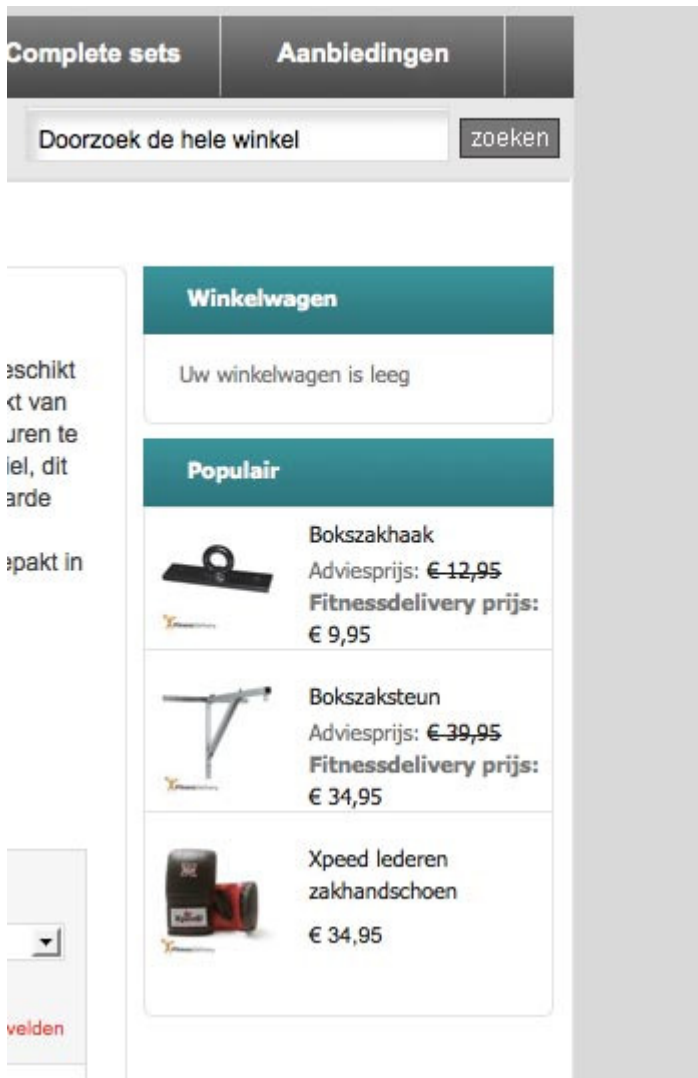

2. Module 'Laatst bekeken' does not appear in menu 'Krachtapparatuur'

Laatst bekeken does appear on all menu's except 'Krachtapparatuur'; make appear in this menu.

>next

### 3. Make module 'Populair' appear on all SUB-category pages

### 4. Add tracking pixel

The following tracking pixel needs to be implemented on the success page of fitnessdelivery.nl

```
<IMG SRC="http://www.ds1.nl/t/?si=1638&ti=<?PHP echo $this->getOrderId()?>&bd=<?PHP echo dc_saleamt; ?>&om=sale&oa=sale" HEIGHT=1 WIDTH=1 BORDER=0 ALT="Affiliates.nl - Kliks.nl">
```

In fact, the following need to be called for in this tracking pixel: order number and amount.

There is some forum discussion on Magento boards of implementing tracking pixels.
